D                      G              D/F#              A  
You were better to me than I was to myself  
D                      G              Em                      A  
You delivered me out of my sin (yes, You did, yes, You did)  
D                      G              D/F#                      A  
I remember the day when I cried for Your help (I remember it well)  
D                      G                      Em                      A  
I remember You called me your friend (yes, You did, yes, You did)  
                                 G                                      A  
And I'm here to praise, my heart's amazed  
                                 G                                      A  
Let my soul never cease to say, "I'm in love!"

D                                      G  
You are more than a friend!  
Em                                      A  
You're the love of my life!  
D                                      G  
From beginning to end  
Em                                      A  
You're restoring your bride

G  
Don't You know? Can't You see?  
A  
You are all, all I need  
G    A  
I keep falling, and falling, and falling in love  
You are more than a friend to me!

I was living a life filled with shame and regret  
I remember You called me by name (yes, You did, yes, You did)  
You delivered a promise that I'll never forget  
You said I could be free from my chains (yes, You did, yes, You did)
